

STRUCTURAL WATERPROOFING

Cook Group offer a complete service for waterproofing structures, whether below or above ground. Our CSSW qualified design team can develop a system to suit any requirements.

Founding in 1974, the company has gained a wealth of expertise in this specialist field. Being industry accredited and with fully trained operatives Cook Group have the experience to match their wealth of knowledge in this field.

We are experts in carrying out waterproofing works for all new build projects from a large commercial development with a multi level basement to a single house retaining wall, and everything inbetween!

Our CSSW qualified in-house design team will design the right waterproofing system for your requirements; ensuring that you have the right system at the most cost effective price - *Genuine Value Engineering*.

Need a combined Ground Gas, Radon and Waterproofing system designing? No problem, it's what we do.

"Fully insured In house CSSW & PCA Waterproofing Design Specialist qualified design team."

Our designs and subsequent works are accepted by all major UK warranty providers such as LABC, NHBC & Premier Warranties.

We have a fully insured in house CSSW & PCA Waterproofing Design Specialist qualified design team.

We can advise on and work to the following guidance

Type A (Barrier) Protection

This includes waterproofing elements applied directly to the structure i.e. self adhesive membranes, cement based renders and liquid applied coatings

Type B (Structurally Integral) Protection

This is primarily reinforced or waterproof concrete that will usually incorporate waterbars for construction joints

Type C (Drained) Protection

Type C is generally known as a Cavity Drainage Membrane System. These systems are water management systems that prevent ground water getting into the living space and more often than not incorporate sumps and pumps.

- **PCA Registered structural waterproofing designers**
- Ground gas membranes
- Podium decks & green roofs
- Structural repairs
- Approved Helifix installers
- NVQ 2 Qualified operatives

BS 8102:2009 - Waterproofing Protection
